**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zallie et al (US 4937091) in view of Magnuson (Cereal Foods World).

Zallie et al disclose a cheese composition comprising modified starch as a casein replacement and the use of emulsifying salts (see entire document, especially column 9, lines 27-42). Zallie et al also disclose substitutes for caseinates include starches, wheat gluten, and mixtures thereof (see column 2, lines 1-9).

The claims differ as to the specific use of wheat gluten and the amounts employed.

Magnuson discloses the use of wheat gluten in the preparation of cheese (see page 180).

In the absence of a showing to the contrary, the amounts employed and the specific type of starch and protein are seen to be no more than a matter of choice and well-within the skill of the art. Applicant is using known components to obtain expected results.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the claimed amounts in that of Zallie et al because the use and manipulation of starches and gluten as caseinate replacements is conventional in the art.

Burkwall (US 3741774), Freck et al (US 3836677), and Zwiercan et al (US 4499116) are cited as of interest.
